

FIGHT FOR OUR PLANET

By Geoff Serpell

Are we humans good stewards of our planet, or are we at war and destroying our liveability, that is, a safe habitat for ourselves, animals, and plants?

Our Uniting Church Synod has confirmed its concern about global warming and climate change and spelt out the harmful effects of natural gas, being a fossil fuel, and the fact that Australia is the largest producer and exporter in the world of natural gas.

Fossil fuels are the remains of organisms in the earth, with high carbon content, used as fuels such as coal, oil and natural gas. Increased global temperatures are melting our ice caps and causing untoward flooding and droughts around the world.

You are invited to choose a personal action, caring for God's creation to ensure our world remains healthy for future generations.

Reflection:

"Do not conform any longer to the pattern of this world but be transformed by the renewing of your mind. Then you will be able to test and approve what God's will is: his good, pleasing and perfect will."

Romans 2:2

GIFTS AND DONATIONS

Gifts, major donations & trusts – help the work of the Church today

Gifts can take many forms, including cash, shares, real or things such as valuable paintings. Some people choose to establish a trust which commences during their lifetime, others choose to establish a testamentary gift (bequest) in their will, others as a memorial to a loved one.
